SUMMARE

Web developer passionate about creating user-friendly web experiences. Skilled in producing efficient, clean, and maintainable code to enhance digital journeys. Enjoys collaborating with dynamic teams to deliver visually appealing front-end solutions

PROJECTS & EXPERIENCE

- E-commerce (advanced)

[Repository](#)

I developed a fully functional e-commerce store using Next.js for the frontend and Strapi as a CMS for the backend. The store features dynamic content management, allowing easy course updates via the Strapi dashboard.

Key features include secure authentication with email verification, a REST API for efficient CRUD operations, and a specialized database for cart management. Images are stored on the cloud to optimize performance, and email notifications are sent for purchase confirmations.

This project demonstrates modern web development practices and strong backend integration.

- React Projects

- **CryptoCurrency:** A project that fetches cryptocurrency data via API, displays detailed information with charts, and uses TypeScript for type safety. [LiveDemo](#) | [GitHub](#)
- **Prayer Times Website:** Developed a prayer times website with a countdown time based on city selection. Utilized an API for city-specific data. [LiveDemo](#) | [GitHub](#)
- **Weather Information Site:** Created a weather information website, fetching and displaying data from an API. [LiveDemo](#) | [GitHub](#)
- **Todo List , Cart Shopping , anime Vault , Countries Information API:** Some projects are built with TypeScript, while others use Redux for state management or interact with various APIs.

- Dynamic web applications development

Skilled in JavaScript, developing dynamic web applications with optimized performance using Webpack. Built 7 projects and designed 10 responsive landing pages for a seamless user experience. Experienced in modern technologies like Sass and Bootstrap for efficient, stylish designs.

EDUCATION

the literary stream, high school, Damascus .

Frontend development with Hsoub Academy.
